

Mini • MUSCO

Project FACTS

Lighting System

- 6x6K HMI par lights
- Fully articulated boom and light rack
- Sound-attenuated generator mounted on board
- Full remote control operation
- Minimal set-up and relocation time

Performance

The Mini Musco meets the need for a more compact and adaptable mobile lighting unit.

The entire bank of high-output fixtures can achieve multi-directional lighting with both rack and flexible 359° pan rotation, 240° tilt capability.

The Mini Musco 80 features electronic ballasts assuring flicker-free operation at any camera speed and shutter angle.
